

DSH-3200x125T

MACHINE SPECIFICATION

Standard Designs for the Hydraulic Press Brake

The brake press is fitted with intermediate upper clamps to prevent wedging

Plate support arms

Powered adjustment of axis depth

Backstop

Light guards

Top and bottom tooling

Estun E21 NC control

German Bosch-Rexroth hydraulic system

Telemecanique/Schneider Electric components

Hydraulic and electrical overload protection

Squaring arm and front support arms

Delta inverter with ball screw and polished rod with 0.05 mm accuracy

Estun E21s NC Control System for the Hydraulic Press Brake

Monochrome LCD box panel

Integral factor freely programmable

Automatic positioning control

Spindle offset allowance

Internal time relay

Stock counter

Backgauge position display with 0.01mm resolution

TECHNICAL SPECIFICATION	
Bending Capacity	1250kn
Bending Length	3200mm
Between Columns	2550mm
Throat Depth	320mm
Slide Stroke	130mm
Stroke Adjustment	150mm
Max. Shut Height	390mm
SPM	>=10
Main Motor Power	7,5kw
Net Weight	7300kg
Outline Size (LxWxH)	3790x1935x2420
